Overview

Chakravashini Fitness Club has been working from past many years with a single motive of encouraging everyone about the benefits of health and they fulfill this motive by always conducting programs like cycle rallies, environment and Animals protection. They also focus on informing every person about the importance of fruits and green vegetables too.

SSMV approach

Study revealed that there is a wide gap between the expectations of the employers and students. SSMV has adapted an approach that fill the gap to achive some degree of two dimensional approach.

One, preparation of fresh graduates with employability skills which just don't comprise areas such as successfully cracking interviews in panels or writing resumes but several other programs such as Video shooting of GD Presentation with full Audio and Video systems on stage, classes in Audio Video rooms and online examinations, provide a realistic experienceto our students.

What is the effect of cycling?

Cycling is a healthy, low-impact exercise that can be enjoyed by people of all ages, from young children to older adults. It is also fun, cheap and good for the environment.

Riding to work or the shops is one of the most time-efficient ways to combine regular exercise with your everyday routine. An estimated one billion people ride bicycles every day – for transport, recreation and sport.

The health benefits of regular cycling include:

- increased cardiovascular fitness
- increased muscle strength and flexibility
- improved joint mobility
- decreased stress levels
- improved posture and coordination
- strengthened bones
- decreased body fat levels
- prevention or management of disease
- reduced anxiety and depression.
